

3049624 - Missing fields in Asset Accounting reporting Fiori Apps

Component: FI-FIO-AA (Financial Accounting > Fiori UI for Financial Accounting > Fiori UI for Asset Accounting), Version: 8, Released On: 21.01.2025

Symptom

When checking Fiori App "Asset History Sheet" (F1615) or "Asset Balances" (F1617), not all fields from transactions AR02/AR01 are available as dimensions in Fiori Apps.

Environment

- SAP Fiori for SAP S/4HANA
- SAP Fiori for SAP S/4HANA Finance

Reproducing the Issue

1. Execute reporting Fiori Apps ("Asset History Sheet"/"Asset Balances")
2. You want report to show a required field
3. Field is not listed as 'Dimension'

Cause

- Not all fields from tables ANLA and ANLZ are part of standard SAP Fiori applications "Asset History Sheet" or "Asset Balances" because of performance and practical usage.
- Standard applications are providing the most suitable and frequently used or needed fields

Resolution

- Fiori Apps are working as designed. Fiori app Asset History Sheet is based on cube view I_AssetHistorySheetCube. This view is released to customers. It means any customer can build their own query on top of this cube view. The association _FixedAsset is exposed, so it is possible to add properties from I_FixedAsset in a custom query. This CDS View I_FixedAsset have reference extension view E_FixedAsset. Using this Extension View, you can add any field contained in table ANLU.
- If, nevertheless there is a specific requirement to display an additional field (not contained in table ANLU), an experience Fiori Developer can be contacted for creating custom Fiori app based on Custom Analytical Query and standard CDS views according to any business needs.

1. For System Versions S/4 HANA 1809 FPS03 and SAP S/4 HANA 1909 FPS01 and above, or after SAP Note [2834107](#) implementation, the following queries are delivered:

Asset Balances: 2CCFASTBALANCE

Asset History Sheet: 2CCFASTHISTSHEET

These queries are build using following consumption CDS views and BW cubes:

Fiori App	CDS View (Analytical Query)	BW Cube (Cube View)
Asset Balances	C_AssetBalance	I_AssetBalanceCube
Asset History Sheet	C_AssetHistorySheet	I_AssetHistorySheetCube

2. For System Versions S/4 HANA 1809 FPS02 and lower, the following queries are delivered:

Asset Balances: 2CCFASSETBAL

Asset History Sheet: 2CCFASSETHISTSHEET

These queries are build using following consumption CDS views and BW cubes:

Fiori App	CDS View (Analytical Query)	BW Cube (Cube View)
Asset Balances	C_FixedAssetBalance	I_FixedAssetValueCube

Asset History Sheet	C_FixedAssetHistorySheet	I_FixedAssetAHSValueCube
---------------------	--------------------------	--------------------------
